

# CLEARPRO

construction water solutions

## COMPANY PROFILE

Water Treatment • Dewatering • Equipment Hire  
Environmental Consulting • Manufacture

## WHAT WE DO

We are a specialist water treatment contractor and system manufacturer based in Southeast QLD. Whether you require mobile water treatment equipment for your dewatering project or a fully customised water treatment system for an industrial site, our team of experts will be able to develop a solution to meet your needs.

## THE CLEARPRO DIFFERENCE

By combining specialist water treatment knowledge with on-the ground services, clearpro is able to streamline projects for our customers and put complex procedures into practice. We are able to manage water treatment projects from preliminary reporting and system design, through to onsite implementation and compliance reporting.

Our dedicated approach to water treatment sets us apart from our competitors who can't match our service delivery and specialised knowledge. Clearpro focuses on building strong client relationships and is able to count some of Australia's largest construction companies as regular clients.

## EQUIPMENT HIRE

### LB15 WATER TREATMENT SYSTEMS

Specifically designed for construction sites with large fluctuations in water quality and flow rate.

### DSR CHEMICAL DOSING SYSTEMS

Patented DSR chemical dosing units designed to be highly portable, compact and simple to operate. Primarily used for pH correction, our range of in-line dosing units can be equipped to accurately dose a range of water treatment chemicals.

### CONTAINERISED WATER TREATMENT SYSTEMS

Clearpro's larger footprint containerised treatment systems are ideal for projects with high inflow rates or difficult to treat water streams.

### CUSTOM BUILD SYSTEMS

Clearpro is able to adapt our existing equipment fleet or completely re-design a system from the ground-up to suit a particular project. Including wall mounted pH correction systems, filtration, sterilisation and sludge press systems.

# WATER TREATMENT

Clearpro has extensive experience across a broad spectrum of water treatment projects. Our patented mobile treatment systems are industry leading, and due to their modular nature can be adapted for use in almost any flow rate scenario. Although primarily known for our capability within the construction industry, Clearpro also works in:

- » Stormwater treatment
- » Liquid waste treatment
- » PFAS treatment
- » Industrial system processes
- » Agriculture
- » Municipal water treatment and mining.

Our range of equipment includes small portable chemical dosing systems, integrated dosing and clarification units, clarifying tanks, sludge holding tanks, sterilisation systems, containerised media filtration systems, screen filtration and high flow chemical dosing systems capable of treating up to 50L/s. Whether you need industrial water treatment services or site remediation solutions, our modular and relocatable water treatments are designed to meet diverse industry needs.

# STORMWATER MANAGEMENT

Accumulated stormwater will typically require treatment prior to discharge. CLEARPRO can manage the entire treatment and discharge process or simply be engaged to provide water treatment in Brisbane and on the Gold Coast. Our systems are suitable for applications such as:

- » Construction site stormwater ponds
- » Roadside sediment ponds
- » Quarry water
- » Lake Dewatering

# DEWATERING

Clearpro is a trusted dewatering contractor specializing in construction dewatering methods like wellpoint, deep-well, and shallow sump extraction. We offer tailored systems with a wide range of pumps to suit any project. Our water treatment units are designed for industry challenges, providing solutions like pH modification, filtration, and heavy metal removal. With modular equipment, we can handle any flow rate and confidently manage complex projects.

*Applications include:*

- » Pipeline works
- » Basement dewatering
- » Underground infrastructure installations
- » Swimming Pool dewatering
- » Tunnels
- » Culverts

# ENVIRONMENTAL COMPLIANCE

Our team at Clearpro comprises of professional workers and environmental scientists that have extensive industry experience and can be engaged to provide the following services:

- » Preliminary project design
- » Water Quality Testing Services and laboratory analysis
- » Monitoring reports
- » Compliance reports
- » Dewatering management plans
